MSAN 630 – Advanced Machine Learning
Instructor: Yannet Interian
Course Syllabus
Spring 2017

SUMMARY INFORMATION
Office: 101 Howard, # 605
Office Hours: TBA
Email Address: yinterian@usfca.edu

Class Location: 101 Howard Street, Room
Class Time: Tuesdays and Thursdays 11:05am - 12:55pm and 3:15pm - 5:05pm
Office Hours: 2pm-3pm on Tuesdays

COURSE GOALS
On completion of this course the student should be able to:

- Describe and apply several learning algorithms and their variants, including: Boosting, Collaborative Filtering, Neural Networks, Support Vector Machine, EM for Gaussian Mixture Models, Hidden Markov Models.
- Select the appropriate learning algorithm or approach for a given situation or dataset.
- Apply the principles of feature selection and engineering.
- Implement from scratch various machine learning algorithms in Python: Adaboost, Collaborative Filtering, EM for Gaussian Mixture Models.
- Apply machine learning to large datasets using Spark.
- As part of a team, carry out a machine learning project from start to end, including:

  - Define an objective or problem to solve, and choose an appropriate dataset(s) for achieving that objective/solving that problem
  - Research literature related to the problem
  - Prepare the data for application of algorithm(s), including feature engineering
  - Choose and apply the appropriate ML algorithm(s)
  - Evaluate the results
  - Communicate the results both orally and in writing

COURSE CONTENT (subject to change)

- Recommendation Algorithms: Collaborative Filtering, Matrix Factorization, Non-negative Matrix Factorization.
- Boosting: Adaboost, Gradient Boosting
- Neural Networks and Keras.
- Support Vector Machines.
- Expectation Maximization (EM) for Gaussian Mixtures.
- Hidden Markov Model: Model for sequential data, tagging text.
- Deep Learning: Convolutional Neural Networks, Transfer Learning, Keras.

TEXTBOOKS

1. Pattern Recognition and Machine Learning. Bishop. (Required)

2. The Elements of Statistical Learning: Data Mining, Inference, and Prediction. Trevor Hastie, Robert Tibshirani, Jerome Friedman. `https://statweb.stanford.edu/~tibs/ElemStatLearn/` (Required)

3. Mining of Massive Datasets. Jure Leskovec, Anand Rajaraman and Jeffrey D. Ullman (Chapters 8, 9). `www.mmds.org`

4. Deep Learning. Ian Goodfellow and Yoshua Bengio and Aaron Courville `http://www.deeplearningbook.org`

5. Machine Learning: A Probabilistic Perspective. Kevin Murphy.

HOMEWORK. You will be required to complete 5 homework assignments. You must work on homework **individually** and **turn in your own individualized write-up and code**. All homework assignments are to be completed and submitted individually. You may consult with other students in the class regarding homework, but each student should complete all parts of the assignment successfully without assistance.

QUIZZES. You will be required to complete 5 quizzes. Quizzes are going to be closed books and notes.

GRADING. Part of my job as an instructor is to assign grades fairly and in a manner that reflects the high academic standards at the University of San Francisco and in the MSAN program. Your grade in this course will be computed according to the following weights:

Component	Weight
Homework	30%
Quizzes	30%
Final Project	30%
Labs / Class participation	10%

ON CHEATING. As a Jesuit institution committed to *cura personalis*—the care and education of the whole person—the University of San Francisco has an obligation to embody and foster the values of honesty and integrity. The university upholds standards of honesty and integrity from all members of the academic community, including faculty, students, and staff. All students are expected to know and to adhere to the university's honor code. You can find the full text of the code online at `http://www.usfca.edu/catalog/policies/honor/`. You are also bound by the terms of the MSAN Code of Conduct that you signed prior to matriculating in the analytics program. Refer to ON HOMEWORK and ON CASE STUDIES sections for details regarding student collaboration on each category of deliverable. Plagiarism consists of copying *any* material from *any* source and submitting it as your own original work, regardless of where that material was sourced: the Internet, a book, textbook, or from deliverables previously submitted by other students. All students involved in any cheating or plagiarized deliverables, i.e., the cheater as well as the person(s) who willfully enabled or facilitated the act of cheating, will be reported to the MSAN Program Director. If you ever have questions about what constitutes plagiarism, cheating, or academic dishonesty in this course, I am happy to discuss with you at your convenience.

ON DISABILITIES. If you are a student with a disability or disabling condition, or if you think you may have a disability, please contact USF Student Disability Services (SDS) at 415.422.2613 within the first week of class, or immediately upon onset of the disability, to speak with a disability specialist. If you are determined eligible for reasonable accommodations, please meet with your disability specialist so they can arrange to have your accommodation letter sent to me, and we will discuss your needs for this course. For more information, please visit `http://www.usfca.edu/sds/`

or call 415.422.2613.

ON BEHAVIORAL EXPECTATIONS. All students are expected to behave in accordance with the Student Conduct Code and University policies (see `http://www.usfca.edu/fogcutter/`). Open discussion and disagreement is encouraged when done respectfully and in the spirit of academic discourse. There are also a variety of behaviors that, while not against a specific University policy, may create disruption in this course. Students whose behavior is disruptive or who fail to comply with the instructor may be dismissed from the class for the remainder of the class period and may need to meet with the instructor or Dean prior to returning to the next class period. If necessary, referrals may also be made to the Student Conduct process for violations of the Student Conduct Code.

ON THE LEARNING & WRITING CENTER. The Learning & Writing Center provides assistance to all USF students in pursuit of academic success. Peer tutors provide regular review and practice of course materials in the subjects of Math, Science, Business, Economics, Nursing and Languages. Other content areas can be made available by student request. To schedule an appointment, log on to TutorTrac at `https://tutortrac.usfca.edu`. Students may also take advantage of writing support provided by Rhetoric and Language Department instructors and academic study skills support provided by Learning Center professional staff. For more information about these services contact the Learning & Writing Center at 415.422.6713, `lwc@usfca.edu` or stop by Cowell 215. Information may also be found at `twww.usfca.edu/lwc`.

ON COUNSELING AND PSYCHOLOGICAL SERVICES. Our diverse staff offers individual, couple, and group counseling to student members of our community. Services are confidential and free of charge. Call 415.422.6352 for an initial consultation appointment. Having a crisis at 3 AM? We are still here for you. Telephone consultation after hours is available between the hours of 5:00 PM to 8:30 AM; call the above number and press 2.

ON CONFIDENTIALITY, MANDATORY REPORTING AND SEXUAL ASSAULT. As an instructor, one of my responsibilities is to help create a safe learning environment on our campus. I also have a mandatory reporting responsibility related to my role as a faculty member. I am required to share information regarding sexual misconduct or information about a crime that may have occurred on USF's campus with the University. Here are other resources:

- To report any sexual misconduct, students may visit Anna Bartkowski (UC 5th floor) or see many other options by visiting our website: `www.usfca.edu/student_life/safer`

- Students may speak to someone confidentially, or report a sexual assault confidentially by contacting Counseling and Psychological Services at 415.422.6352.

- To find out more about reporting a sexual assault at USF, visit USF's Callisto website at: `www.usfca.callistocampus.org`.

- For an off-campus resource, contact San Francisco Women Against Rape 415.647.7273 (`www.sfwar.org`).
